Home, Gallery, Offices and
Restaurants

- ▶ Specification Quality Optics
- ▶ Powerful Lumen Output
- ▶ Tightly Binned LEDs
- ▶ Controlled Beam
- ▶ High 80+ CRI

LRELD467
4" Adjustable Pull Down

LRELD467:

4" Adjustable Pull Down LED Adjustable Lighting for the Modern World

Adjustable LED Pull Down Trim can be used with LITON new construction and remodel housings with a medium base or GU24 socket and is retrofit-able for use with line voltage or GU24 housings. The elbow design provides full horizontal and vertical adjustability allowing it to function as an accent light and a downlight. Lumen output is comparable to a 50W MR16 Lamp.

Fine dining establishments and chain restaurants alike strive to provide an intimate dining experience through strategic placement of lighting. Bars and cocktail lounges also benefit from unobtrusive lighting that creates an atmosphere more conducive to social interaction. Until now, these establishments have been hostage to outdated MR16 technology and adjustability.

LITON's New LRELD467 Adjustable Pull Down Trim is ideal for highlighting art, artifacts and displays in museum or gallery environments where pinpoint aiming is important but UV control is imperative. Low voltage and incandescent lamps are notorious for the damage they do to canvas, prints, fabrics and expensive wall coverings. LITON LED is known for almost imperceptible UV levels.

LITON's New LRELD467 Adjustable Pull Down Retrofit Trim is a great tool for highlighting artwork, furniture, wall hangings, fireplace mantles and other areas that deserve attention. Use it as a wall wash to light walls in media rooms, dens and man caves rather than direct intrusive downward lighting. Light coves, nooks and hallways to bring out the hidden beauty of the objects within without bringing attention to the lamp source.

The adjustability of the LRELD467 allows it to function as a downlight, accent light or a wall wash. Ideal for ever-changing retail environments. Need to move a fixture? Move the light with it and open up the possibilities. Want to bring focus to display counters without blinding your clientele? LRELD467's unique glare-free design means you can bring powerful focus to the jewelry case without creating visual discomfort in other parts of the store. The dimming option allows you to set the mood or change it!

4" Adjustable Pull Down LED

Available Housings

For use with LRELD4 series LED GU24 trims

LH99ICA-LLF-GU24
New Construction ICA Housing
